# Our Values

# Our Infrastructure

---

- Windows Servers
- One to two hours to restore entire server configuration in case server goes down
- We are using different tool like Skype, GotoMeeting and even VoipConnect for Voip Call.
- We use Cyberoam Switch as our Network Security Appliance
- We have 2 - 20MBPS line of different internet provider. As well we are always having internet dongle for emergency backup.
- We are having regular backup of Code and Database on drive that stays at other location, other than office. We even take encrypted backup of important projects securely on internet drive.
- Our development machine contains OS: Windows 8.1 / MAC OS/ Ubuntu
- Development Environment: Visual Studio 2013, SQL Management Studio, Source Control Provider ( We generally use SVN but as per client requirement, we install as necessary). Android Studio, Eclipse , XCode and other development tools
- Hardware : i3+ Processor and 8GB RAM. Mac Mini for iOS development.

# Intellipro Advantage

- Result Oriented Approach
- In Depth Domain Expertise
- Technically sound and experienced talent pool
- Commitment towards quality
- Quick Response Time
- Maximal Return on Investment
- Management involved in day to day operations
